Welcome Back To Your School!

The staff extends an enthusiastic welcome to all of our students and families joining us for our new learning journey. This year will be exciting and filled with many opportunities for our students to learn in new ways and expand their leadership skills.

We recognize the first week back to school can be stressful and to assist that process it is important to establish or re-establish those important back to school routines.

Our enrollment is growing and we plan to have all of our students placed into their new classes by the end of the week. In the meantime all students will be working in grade groups with last year's teachers and reflecting on our Social Responsibility theme of, "Being a Bucket Filler!". Social responsibility at Talmey is an important component of our daily process of learning. While we "Focus On The Learner" we follow the "STAR" Code of Conduct:

"S"afe
"T"houghtful
"A"ccepting
"R"esponsible

The District has instituted a new online payment process and further information will be sent home in the next few days. To assist us with this we will be asking for an up to date email address for each family.

The construction/renovations, to replace the roof and to replace the exterior covering of the building, have started. Safety is the utmost concern for us and we will be monitoring the work with the work site supervisor to ensure a safe operation and renovation of the school building. The construction is going to take a number of months depending upon the weather conditions, but once completed we will have a renovated building that will have numerous improvements for our learning community.

PAC Information

All parents are automatically members of the vibrant Talmey PAC – Parent Advisory Committee. We meet once a month to plan supportive activities for the enrichment of the entire school population. More information will be forthcoming as to the schedule of meetings and events for the school year.
